Projects

Bluefy Clone Website

In this we made a clone website of Bluefly company. In this we used html,css and javascript languages

Features

- In this we made a clone website of Bluefly company. In this we used html,css and javascript languages. I learned how to do teamwork in this Project

Tech-Stack

HTML | CSS | JavaScript

Area of responsibility

- I made the homepage of this clone website and also help my team mates in Sorting and Filter Part

PharmEasy Clone Website

We made Exactly same Pharmeasy Clone website mainly using HTML,CSS and JavaScript.

Features

- In this we made a API on our own and fetch that data and appended on the page. We also give sorting and filter part.

Tech-Stack

HTML | JavaScript | CSS | Bootstrap

Area of responsibility

- In this i made Order medicines and Healthcare Product Page. In order Medicine Page also added one Search bar to Search medicines from our API.
